For:

Simplified Wind Deflector for Vehicle Roof Closure

## <u>AMENDMENT</u>

Commissioner of Patents and Trademarks Washington, D.C. 20231

Dear Sir:

In response to the Final Office Action of 8 March 2001, Applicant asks that the abovereferenced application be amended as follows:

## IN THE CLAIMS

Please make the following changes to the claims. A marked up version of the original claims is attached in Appendix 1.

(Twice Amended) A vehicle roof comprising: 1.

an aperture;

a roof closure member movable between open and closed positions, and said closure member enclosing said aperture when in said closed position, and exposing said aperture when in said open position;

a wind deflector movable between an extended position and a stowed position, and a portion of said wind deflector extending upwardly above a vertical position of said closure
